# HAVE YOU DYSPEPSIA?

(SCIENCE CALLS IT CATARRH OF THE STOMACH.)

MISS DADE STOGEMAN, OF CHICAGO.

Miss Dade Stogeman, Superintendent of the Chicago North Side Woman's Club, of Chicago, in a recent letter to Dr. Hartman, speaks of Pe-r-na as follows: "Pe-r-na has often been used by the members of our club in cases of stomach trouble and general debility—also recently in cases of la grippe, and always with the most beneficial results. I think a great deal of Pe-r-na—often recommend it to my friends, and am glad to say all who have tried it speak a good word for it."

Dr. S. B. Hartman—Dear Sir: I have been troubled with dyspepsia and indigestion for many years, and was very much reduced in flesh. I could not eat anything without the greatest distress after meals. My food would come up and my stomach became very weak from fasting, as I preferred to go without food rather than suffer for the consequences. I could get no rest by day or sleep by night. I tried every remedy advertised for the cure of dyspepsia without the least benefit. At last I got a bottle of Pe-r-na. I confess I had no faith in it, as I had been so often disappointed; but in a day or so I felt much improved. Food did not distress me as before. I continued its use, and, after using a dozen bottles, I was a well woman. I can eat anything without the

least distress, sleep well, and, instead of the living skeleton I was, I am now a healthy, fleshy woman. This was 1890, and I have continued well ever since. I have not been without your remedy in the house since my recovery. I advise all sufferers to do as I did and be cured.

Mr. John F. Schmidt says: "Pe-r-na has saved my life. For five years the best doctors had pronounced me incurable. I suffered with a complication of diseases—palpitation of the heart, nervousness, weakness and dyspepsia. A few bottles of Pe-r-na and Man-a-lin cured me. Pe-r-na cannot be beaten. I give your medicine to my children for the various little ailments which annoy little ones, and the result is that they are never sick, but always strong and healthy. I have gained forty pounds since taking Pe-r-na."

So many people have what is called dyspepsia without having the slightest suspicion that catarrh of the stomach is the cause. Such people take peepsin and a thousand other things, vainly hoping to get well. But the catarrh remains, and of course the dyspepsia remains. Pe-r-na cures these cases permanently by removing the cause, which is catarrh. Pe-r-na has cured more cases of dyspepsia than any other remedy in the world. Address Dr. Hartman, Columbus, Ohio, for a free book.
